 - Knowledgeable in user interface, testing, and debugging processes.
 - Able to effectively self-manage during independent projects, as well as collaborate as part of a productive team.
-

Experience

Front End Developer

ECI LTD • Lagos Island, Lagos

07/2021 - 08/2022

- Company's stack was React and Tailwind on the front end, Java and Python on the back end.
- Worked closely with the company key player's and Front End Engineers in creating great user experience web applications using React, React components, Router router and it's other core features.
- Developed landing pages using Tailwind, from the navigation bar, to the side menu and also integrated user friendly animations with Javascript's external animation libraries.
- Collaborated with the UI/UX team to bring new concepts and ideas to life and implementing them to the existing features.
- Did a few presentations on why certain features had to be removed, edited and added for great functionality purposes.
- Used CSS best practices to make sure the web application is responsive across all devices.
- I was in charge of downloading packages from the internet using node package manager(npm).
- Organised monthly coding challenges for I and the other developers on the team from Edabit and Leetcode.

Front End Developer

PILE FOUNDATIONS LLC • Abuja

03/2019 - 10/2020

- Worked with the team that developed several Single Page Applications using React JS, Angular and Vue JS.
- Developed and modified features that were essential in giving a great user experience.
- Collaborated closely with the team that wrote unit tests and helped in the way I could.
- Strong understanding of web standards, cross-browser compatibility, responsive design, Bootstrap, CSS frameworks (LESS, Sass), and AJAX.
- Responsible for ensuring the applications work with browsers our end-users use.
- Performed enhancements and modifications to meet requirements and integration of new features.
- Spent extra hours debugging production code to ensure durability.
- Ensuring proper documentation and reports in all stages of product life cycles.
- Made presentations with clients explaining to them how the projects were done from start to finish.
- Did a few code reviews for aspiring developers that needed a bit of guidance.

Jnr Front End Developer(Intern)

Virnex communications • Uyo

02/2018 - 11/2018

- Built front end web applications using HTML, CSS and VANILLA JAVASCRIPT.
- Tasked with the objective of enhancing user experience by making web applications responsive on all devices.
- While React was the company's tech stack, I used Angular and bootstrap to build rich web applications with user friendly features.
- Worked closely with the team that implemented the web application's form validation, pagination and other important features.
